Problem of accessing **Anatomedia**

When using the database – Anatomedia on PC, you may meet with the following page which stops the access to further contents.

![Unsupported Resolution](image)

It is caused by wrong resolution of the browser page. The database requires higher resolution to display the contents.

To change the resolution, use key combination “Ctrl – (minus sign)”*. Once the resolution is adjusted well, the following homepage will display. You could navigate the database now.
